

LB bilateral osteotomy

(June 2018)

It is not an understatement to say that Mr O'Leary has changed my life. After suffering with pain for over 4 years which meant giving up running and seeing numerous different consultants, I was referred to Mr O'Leary. He was really supportive and understanding from the very first appointment to the final operation to remove the metal plates. I can't thank him enough for finally making me pain free.

... please pass on my thanks to Mr O'Leary as he has really helped and was great throughout the past year.
